

TRISK

The new generation curing systems

Infrared – Ultra Fast

The new generation of Trisk curing systems provides bodyshops with an affordable, easy to use drying of all kinds of paint systems.

- ◆ full power in less than one second
- ◆ short wave – quick curing times
- ◆ ventilated cassettes and lamps
- ◆ long lifetime of lamps
- ◆ low running costs

Trisk CureSaver 2

- Short wave infrared unit for curing of paint material on horizontal and vertical surfaces.
- Two power levels with timers. Half power up to 30 minutes. Full power up to 30 minutes.
- Easy to handle and easy to use.
- Roof drying up to 1,8 m height.
- The ideal infrared unit for use in the prep area for spot repairs.

Trisk CureMate 2

- Short wave infrared unit for curing of paint material on vertical surfaces
- Two power levels with timers. Half power up to 30 minutes. Full power up to 30 minutes.
- Easy to handle and easy to use
- The cassette can be positioned in a height up to 1,6 m.
- For use in the prep area for spot repairs.

Trisk HotSpot with stand and timer

- Short wave infrared unit.
- Used as a handheld heater or mounted on a stand with a timer allowing for a maximum 30 minutes of curing.
- Effective for curing all paint materials on any small, hard to reach spot repair.
- Ideal for preheating decals and pinstripping prior to removal.

TECHNICAL DATA

Curing area

1 x 0,9 m (39" x 35")

Electrical data

230 V , 1 Ph+ Pe, 3000 W, 13A.

Slow fuse to be used.

Curing area

1 x 0,9 m (39" x 35")

Electrical data

230 V, 1 Ph+Pe, 3000 W, 13 A.

Slow fuse to be used.

Curing area

at a distance of 0,40 m: 0,4 x 0,2 m (16" x 8")

Electrical data

110 V, 1 Ph+ Pe, 850W, 8A
